

IIOT ready to deploy solutions

Machine Monitoring

End-to-end machine monitoring (CNC, robotic arm, SWISS, Precisions, etc.) To identify factors like health parameters, uptime and downtime, asset operations and overall equipment effectiveness.

Production line performance

Accurate production line monitoring enables you to maximize efficiency, capacity, improve management, line stoppages and track operator efficiency, etc.

OEE Measures

Real-time metrics for identifying production bottleneck, benchmarking progress, asset performance, analyzing historic processes, and improving productivity.

Quality Analysis

Examine the quality and design of the product by creating quality benchmarks and safe measures while ensuring regulatory compliance with ISO standards, FDA regulation, and ITAR.

Asset & Inventory Tracking

Provides real time insights to locate assets and inventory. This helps prevent losses, maximise asset utilisation and optimise their role in process.

Energy & Sustainability

Monitor and control energy consumption of industrial equipment reduce energy wastages, lower CO2 emissions and rising energy prices, etc.

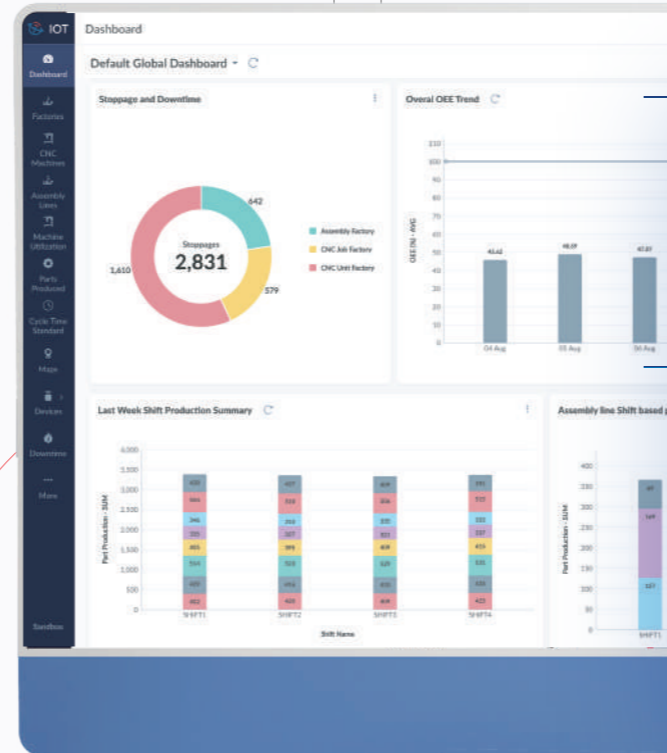

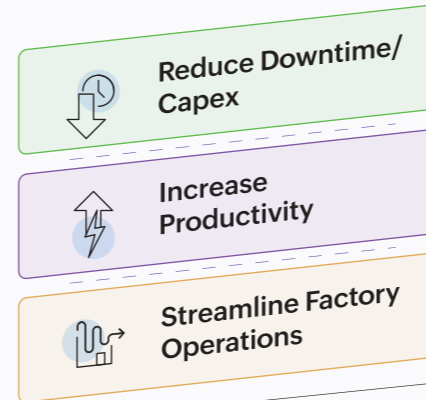

Utilities Monitoring

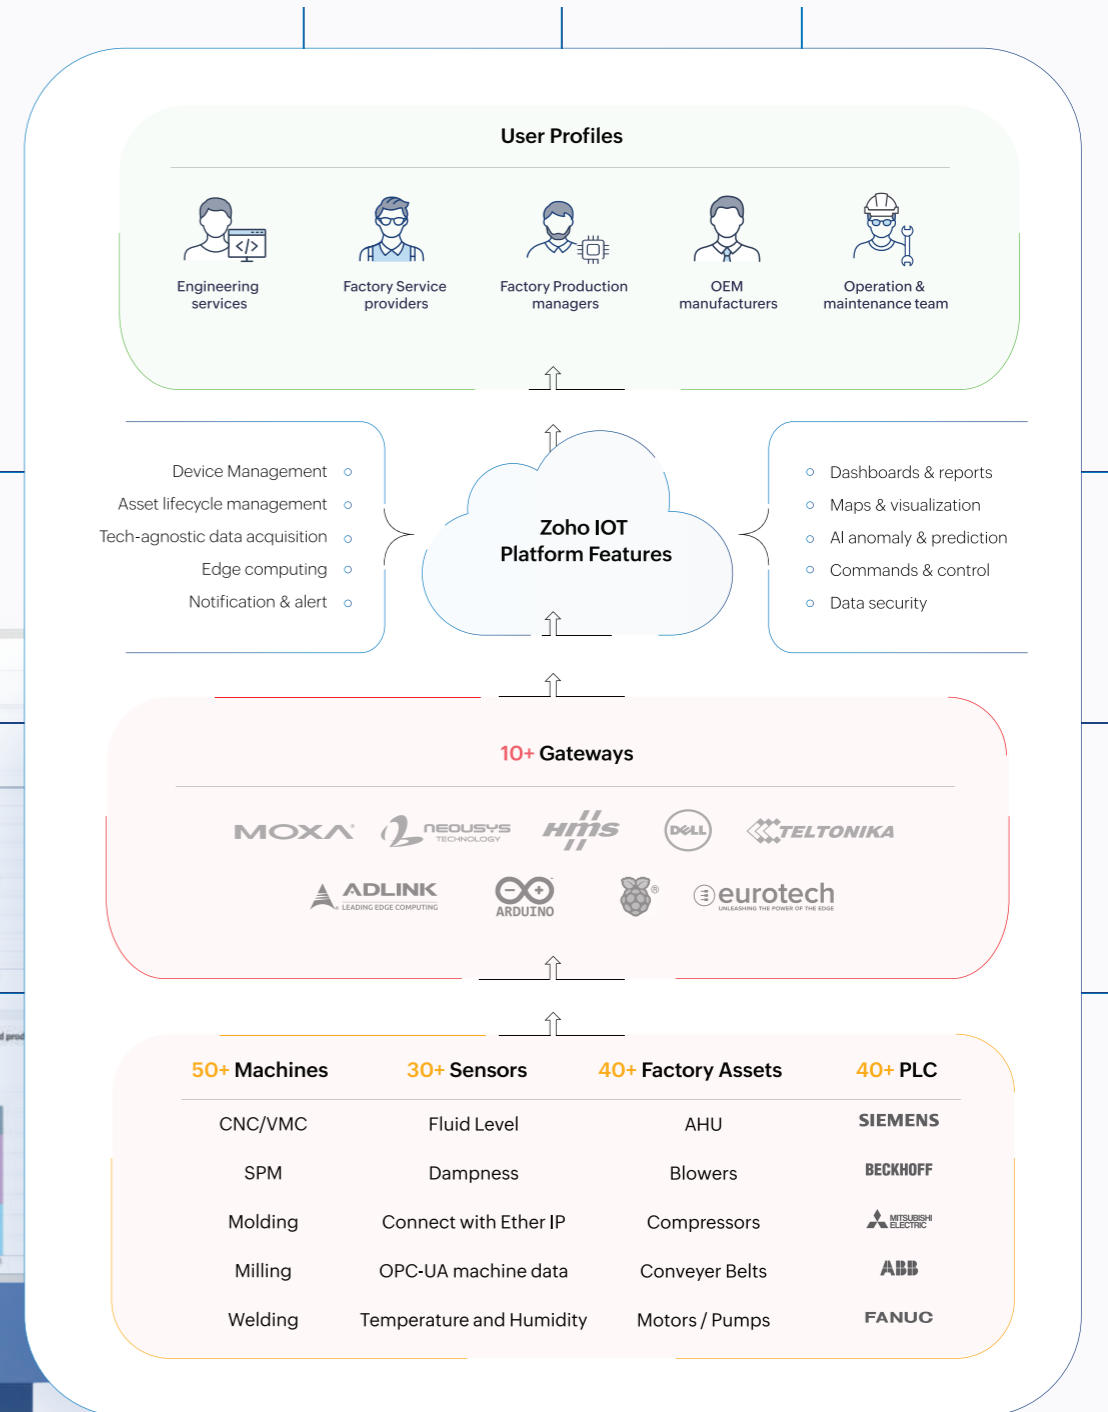

Acquires, manages, and reports vital data from power/water/gas meters such as voltage, velocity, pressure and leakages, while performing demand planning, fault management, forecast, etc.

And more -

- Shifts and Job Allocations,
- Maintenance and SLA,
- Safety and Control,
- Third Party Integration

Powerful Architecture in its core

IIOT Solutions for unified and intelligent factory operations

Utilization rate:
25.4%

Our service and vision

Drive innovation with an exemplary Industrial Internet of Things (IIOT) platform. Our platform serves as a foundational framework for harnessing the power of connectivity and data in the industrial sector. And facilitates digital transformation.

Utilise or extend the core platform modules to gather and examine data in real-time (machine/ERP/human) from your manufacturing process. Make impactful decisions with practical insights starting today.
